

M. N. NAFEEL

MECHANICAL ENGINEERING TECHNOLOGY GRADUATE | PRODUCTION, MANUFACTURING & CAD DESIGN

Kandy, Sri Lanka | +94 77 942 2553 | nafeel550@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Mechanical Engineering Technology graduate with hands-on exposure to FMCG manufacturing, industrial maintenance, workshop machining, and continuous improvement through internships at Hemas Consumer Brands and the Sri Lanka Ports Authority. Skilled in CAD modelling, production KPI monitoring, Lean/TPM/Kaizen practices, preventive maintenance, and cross-functional teamwork. Developing an independent mechanical design portfolio while seeking an entry-level role in production, manufacturing, process improvement, maintenance, or mechanical design.

CORE COMPETENCIES

Mechanical Design | Production Engineering | Manufacturing Operations | Process Improvement | Lean Manufacturing | Preventive Maintenance | Root Cause Analysis | Continuous Improvement | Engineering Drawing | Workshop Practices

INDUSTRIAL EXPERIENCE

Manufacturing Intern

Nov 2025 - Apr 2026

Hemas Consumer Brands | Dankotuwa, Sri Lanka

- Supported daily manufacturing operations in an FMCG environment and coordinated with production, quality, maintenance, and engineering teams to meet safety, quality, and productivity requirements.
- Monitored production KPIs and assisted continuous-improvement activities focused on operational efficiency, downtime reduction, and manufacturing performance.
- Participated in Lean Manufacturing, TPM, and Kaizen initiatives and supported the identification of process losses and improvement opportunities.
- Assisted maintenance coordination, utility-management activities, and process-optimization work across internal and third-party manufacturing facilities.

Industrial Trainee - Mechanical & Electrical Engineering

Sep 2022 - Mar 2023

Sri Lanka Ports Authority | Colombo, Sri Lanka

- Supported preventive and corrective maintenance of mechanical, electrical, and electromechanical equipment to improve availability and operational reliability.
- Performed workshop operations including turning, milling, drilling, fitting, basic machining, metal-arc welding, and fabrication under technical supervision.
- Assisted troubleshooting, servicing, and rewinding activities for single-phase and three-phase electric motors.
- Applied workplace safety procedures and collaborated with multidisciplinary teams during maintenance and workshop activities.

INDEPENDENT CAD DESIGN PORTFOLIO

Independent Mechanical CAD Projects

2026 - Present

Personal engineering portfolio

- Created and refined mechanical part and assembly models including a gearbox, hydraulic cylinder, bearing housing, end-milling cutter, slider-crank mechanism, and exhaust-nozzle concepts.
- Practised parametric modelling, assembly constraints and joints, surface and sheet-metal tools, design intent, and manufacturability considerations using Autodesk CAD software.
- Published selected models and project descriptions through a personal web portfolio to demonstrate continued technical development outside formal employment.

SELECTED ENGINEERING PROJECTS

Feasibility Analysis of a Small-Scale Plastic Pyrolysis System

2025 - 2026

Final-year engineering project

- Evaluated the technical and economic feasibility of converting plastic waste into liquid fuel for small-scale waste-to-energy applications in Sri Lanka.
- Developed a conceptual 30 L batch-reactor system with an external heating arrangement and condenser, considering process temperature, material selection, heat demand, operating requirements, and safety.
- Assessed feedstock performance, projected oil yield, capital and operating costs, profitability, and payback using literature and secondary-data analysis.

Green Maintenance Practices in Automotive Workshops

2025

Academic project

- Analyzed environmentally responsible maintenance practices and proposed measures to improve workshop efficiency while reducing waste, energy use, and environmental impact.

EDUCATION

Bachelor of Engineering (Honours) in Mechanical Engineering Technology Lincoln University College Second Class Upper Division	2024 - 2026
City & Guilds Level 5 IVQ Advanced Technician Diploma in Mechanical Engineering City & Guilds of London Institute	2023 - 2025
Diploma in Production Technology Sri Lanka German Training Institute Merit Pass	2020 - 2023

TECHNICAL SKILLS

CAD & Design: Autodesk Inventor, Fusion 360, SolidWorks, AutoCAD; 3D modelling, assemblies, engineering drawings, sheet-metal and surface modelling
Engineering & Analysis: ANSYS, MATLAB; thermodynamics, fluid mechanics, materials, mechanics of machines, and machine design
Manufacturing & Quality: Lean Manufacturing, 5S, TPM, Kaizen, Six Sigma awareness, production KPIs, process improvement, root cause analysis, ERP exposure
Maintenance & Workshop: Preventive/corrective maintenance, machining operations, fitting, welding, fabrication, motor maintenance, safety practices
Programming: Python, C++

CERTIFICATIONS & PROFESSIONAL AFFILIATIONS

Certifications: Occupational Safety and Health; Chemical Handling Health & Safety; Firefighting & Rescue Training; Machine Learning for Engineers
Affiliations: Affiliate Student Member - Institution of Mechanical Engineers (IMechE); Member - International Association of Engineers (IAENG)

LANGUAGES

Tamil (Native) | English (Working proficiency) | Sinhala (Conversational)
